Sunlight has grown from a humble electrical contractor to a class leading manufacturer of low voltage switchgears.

Sunlight provides only the safest, reliable and most effective products and solutions. As such, we are trusted by many industrial customers and real estate owners, Singapore and overseas.

Our commitment to quality transcends to the modern generation with our emphasis on being environmentally conscience. Our foray into "Green Switchboards" and our partnership with the SGBC for certification of our complete line of power distribution products, is a telling story to the commitment which we stand for: Quality, Reliability, Safe and Clean.

Sunlight has tested the Low Voltage (LV) Switchgear and Controlgear to the following IEC requirements:

**LV Switchgear and Controlgear** - IEC 61439-1 & 2: 2009  
**Degree of Protection** - IEC 60529: 2001  
**Internal Arc Fault** - IEC TR 61641: 2008

Sunlight has a complete range of tested switchgear and control gear systems. These systems cover the whole spectrum of low voltage applications from the main switchboards to the smallest distribution board and process panels. Sunlight LV System has a proven record of good performance and high level of reliability.
